

CROWN

C-D

8,000-12,000 lb Capacity

Diesel Pneumatic Tire

Robust, Reliable and Versatile

The C-D Series 8,000 to 12,000 pound diesel pneumatic forklifts deliver power and versatility to conquer tough tasks and rough environments. Backed by Crown's proven service and support network, the rugged C-D Series is designed to perform over the long haul, across many challenging applications.

Supporting Safety in Outstanding Comfort

Crown's C-D Series 8,000 to 12,000 pound diesel lift trucks are designed to provide the comfort operators request with safety features they should expect. This spacious compartment features a wide floorboard complemented by a telescopic steer column and a standard 5-inch full-color LCD display. The integrated storage tray includes a 12V power supply for charging accessories and allows operators to keep tools and documents close by.

Adjustable Steer Column

The tilting steer column is also telescopic, allowing for individual operator comfort and convenience.

Intuitive Instrument Panel

A standard 5-inch full-color LCD display provides a clear view of information and indicators important to the operator. A larger 7-inch screen is also available as an option.

Electronic Parking Brake

A switch-activated parking brake eliminates the need for routine brake adjustments and cable replacements.

Automatic Shift Control

Choose from automatic shifting between the two available gears or manual gear selection from the steer column.

Premium Adjustable Seat (optional)

A full-suspension Grammer comfort seat accommodates individual operator preferences.

Full Cabin (optional)

The optional heated and air conditioned full cabin provides extra comfort to help boost productivity in all types of environments.

Excellent Visibility

- Overhead guard design allows for a clear upward view while adding strength for increased protection.
- Hydraulic hoses and chains arranged strategically close to the mast uprights provide a wide-open view.
- Standard large dual mirrors
- Optional Tilt Position Assist
- Optional LED work light packages

Spacious Compartment

Placement of the tilt cylinders under the wide floorboard allows for plenty of knee clearance.

Entry and Exit

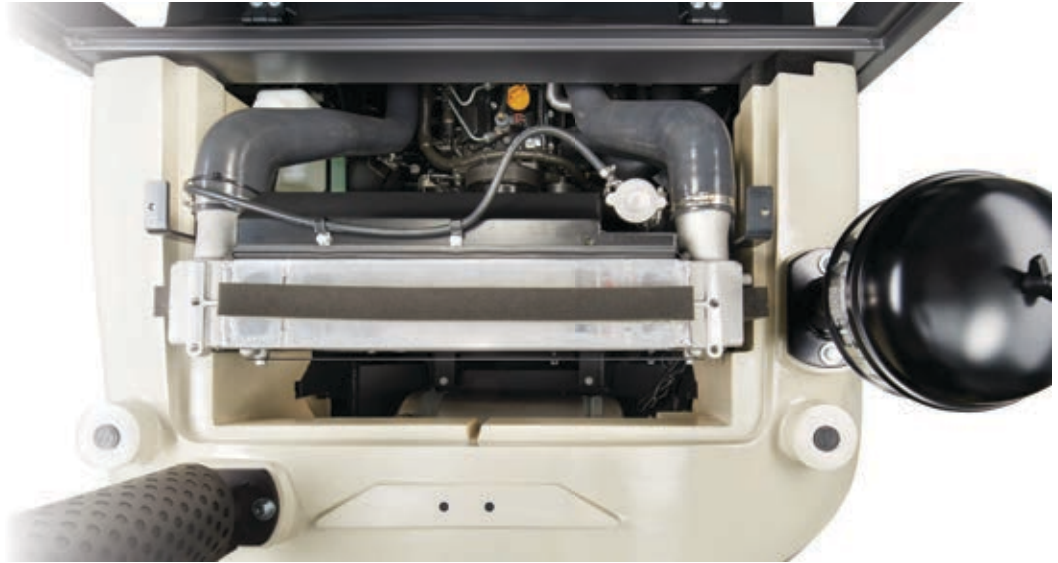

The combination of a contoured seat deck and high-visibility open step assists traction for operator entry and exit.

Crown's Proven Service and Support

Crown support begins long before the lift truck leaves the factory. Our integrated approach to service provides an outstanding user experience to our customers—before, during and after the sale.

Quick and Easy Access

A durable, removable counterweight cover provides ready access to the radiator and other critical components.

Service with Ease

- The wide-open hood angle allows for comfortable inspections and routine maintenance.
- Tool-less side panels and floorboard panels can be easily removed for diagnostics and service checks.

Robust Steer Axle

Large steering spindles with king pin and taper roller bearings are designed to absorb impact and keep moving parts free of contamination. A thick cast iron axle beam offers strength and durability.

You can count on Crown to build lift trucks designed for safe operation, but that's only part of the safety equation. Crown encourages safe operating practices through ongoing operator training, safety-focused supervision, maintenance and a safe working environment.
