8,000-12,000 lb Capacity

**LPG Pneumatic Tire**

# Ready To Deliver

Crown 8,000 to 12,000 pound pneumatic forklifts combine lift truck performance and operator-centric design with Crown's proven support network to deliver a tough material handling solution that exceeds expectations.

## Versatility by Design

Crown forklifts can meet the needs of most any rugged outdoor application from industrial products and pipe to building materials. Regardless of the load or terrain, these tough forklifts are the right tools for the job.

# Confidence Builder

Crown 8,000 to 12,000 pound LPG pneumatic forklifts deliver confidence, visibility and precise control to the operator. One of the most spacious operator compartments in the industry offers a standard suspension seat and hydraulic controls well within reach. In addition, the optional heated and air conditioned cabin boosts comfort and productivity in all types of environments. Operators will appreciate the visibility, fit, feel and finish.

### Ergonomic Operator Environment

- Wide-open leg room
- Tilt steering column
- Suspension seat with high-visibility seat belt
- Operator sensing system
- Park brake alarm
- Operator storage tray
- Cabin and roof cover options

### Easy-to-Read Instrument Panel

- Engine oil pressure
- Engine coolant temperature
- Transmission temperature
- Brake oil level
- Mast interlock

## Durability Through and Through

Heavy-duty IC forklifts need the endurance to last during long shifts in tough, hot conditions and the key to long-term performance begins with the powertrain.

That's why Crown offers some of the most durable industrial engines and transmissions available, protected by innovative, high-capacity cooling systems.

A 2-speed powershift transmission comes standard with an autoshift controller. This programmable feature helps extend transmission and tire life by softening directional changes—automatically returning the transmission to first gear when the lift truck comes to a stop.

Crown's industrial dual radiator provides separate cooling for the engine and transmission, reducing fluid temperatures to protect and extend powertrain life.

## Ready to Deliver.

# Crown's Proven Support Network

Crown support begins long before this truck leaves the factory. Our integrated approach to service provides an outstanding user experience to our customers—before, during and after the sale.

## Safety and Training

Our comprehensive training programs for operators, supervisors, technicians—and even pedestrians—can help support your efforts to provide a safe and productive work environment. Our DP TrainSafe Train-the-Trainer program offered locally can provide your organization with tools to efficiently train new operators using your own resources. At our Regional Training Centers, DP Service Technician Training goes above and beyond traditional classroom training, allowing participants to work on lift trucks with instructor supervision.

## Forklift Maintenance and Repair

Crown's Integrity Service System keeps your forklifts running—regardless of brand. From time and material to complete maintenance, our Integrity Service System offers a variety of service plans to suit your needs in the most efficient and cost-effective way. Our well-stocked, GPS-dispatched service vans ensure your service technician arrives with the right part at the right time.

## Fleet Management

Infolink® Operator and Fleet Management puts the power of accurate, on-demand business metrics at your fingertips. When robust data drives confident decisions, your organization can achieve improved results in safety and compliance, higher productivity, lower costs and optimized operations. InfoLink Data Services can help create a solid foundation to help you achieve your goals and provide data integration and other consultative services to continue your journey.
