

FC SERIES

**PRODUCTIVITY
REDEFINED**

Take the toughest, strongest truck and making it better meant making it faster and more maneuverable to get into more places. Places where you can use that strength to move more loads and improve your performance every day.

Learn how the FC 5200 can give your business the Crown Advantage:

AC Dual Drive Traction

Dual AC Drives give you the ability to turn the toughest truck in some of the tightest spots and move more loads. Dual AC drives also give you more speed and acceleration.

New Steer Axle Design

A new steer axle design combines the toughness and reliability you expect from a Crown lift truck with maneuverability unlike any other four wheel truck in its class.

eGen Braking

Practically eliminate maintenance costs with Crown's frictionless eGEN braking system that extends operating time and delivers long lasting reliability.

Intrinsic Stability System

This proactive approach to stability is built into the FC5200 Series unlike competitive systems which react to unstable conditions.

Access 123 Control System

A comprehensive control system enables safe, reliable, industry-leading lift truck performance and diagnostics which is incorporated across the entire Crown line.

Find out how the FC 5200 can make you more productive today!
